Description: Webful is private startup company with Ekomobong Archibong as the founder and C.E.O. of the company with less than **30 employees**. We are based in Ibadan, Nigeria. We help our clients in creating an online presence for their business or project thereby increasing their productivity by 21%. Our primary services include: Web Design & Development, Mobile App Development & Graphic Design. We put our best into every work we do and are honest in our dealings with our clients. We also believe in giving our clients the best of our brilliant efforts within the short period of time.

Mission: To offer high quality web services to our clients and give our best in a short period of time.

Vision: To fill the gap between digital people and the clients in need of such people.

Product Description: We offer high quality web services. Such services include:

Primary Services:

- Web Design & Development
- Mobile App Development
- Graphic Design

Secondary Services:

- Bug Removal & Website Maintenance

- Data Entry

Description of Services:

- **Web Design:** We design fully-responsive websites that display basic information about our clients or their businesses. We also design church websites. The service also includes design and customization and social media integration.
- **Web Development:** We develop highly-scalable and highly-sophisticated web applications. Examples include blogs, e-commerce websites and so on. Such applications will involve user-management systems, payment systems and much more.
- **App Development:** We develop mobile applications that run across platforms like Android and iOS.
- **Graphic Design:** We design logos, posters and other related graphic items.
- **Bug Removal & Website Maintenance:** We fix bugs in websites and also engage in maintenance of the software and also the technology used in creating such software.
- **Data Entry:** We perform data entry for large amount of data for our clients. We also capture information from soft-copy documents.
